-ABOUT ME

Enthusiastic and self-motivated Front-End Web Developer with a solid foundation in HTML, Bootstrap, Tailwind CSS, JavaScript, and React. Passionate about creating responsive and user-friendly websites. Strong problem-solving skills developed through learning Data Structures and Algorithms in C++. Eager to contribute and grow in a dynamic development team.

-EDUCATION

2024 - 2027 Bachelor of Computer Applications

VNSGU

2021 - 2024 10TH AND 12TH FROM SUNGRACE SCHOOL

-PROJECTS

• ADD TO CART

Developed a responsive "Add to Cart" web application using HTML, CSS, JavaScript, and React. The project allows users to browse items, add or remove products from the cart, and dynamically update the total price in real time. Created a clean user interface with smooth user experience. Practiced modular coding and reusable components to maintain code efficiency and readability.

• Employee Management

Built a fully functional Employee Management System using React to perform CRUD operations (Create, Read, Update, Delete). Implemented forms to add and update employee records with real-time data rendering using React state management. Designed a clean, user-friendly interface with responsive layouts using CSS, Bootstrap, or Tailwind CSS.
